Summary

Software Engineer with **3+ years** in **Java** backend and full-stack (**Spring Boot**, **Spring Security**, **JPA/Hibernate**, **REST APIs**, **React**). Delivered telecom/BSS for global clients in **Agile/Scrum** squads—**Apache Camel** (1M+ daily transactions), **PostgreSQL/SQL** tuning, **CI/CD** (**Jenkins**, **SonarQube**, **GitHub Actions**), **OAuth2/JWT**, **OpenAPI/Swagger**, and **Linux/Docker** deployment.

Experience

AMDOCS DEVELOPMENT CENTER — Software Engineer

07/2023 – Present

XL Axiata — Java developer

Pune, Maharashtra

- Delivered third-party service integrations in **Agile/Scrum** squads, improving internal-external system communication and partner onboarding for production telecom traffic.
- Designed and optimized **Camunda** workflows and automated testing frameworks; improved performance test execution speed by **5%**, workflow reliability, automation efficiency, scalability, and monitoring systems.
- Collaborated on **database optimization**, reducing query response time by **10%** and reducing fallouts.
- Supported production incident triage and root-cause debugging for integration and **Camunda** workflow issues, improving release stability on supported telecom modules.

VODAFONE Germany — Software developer

- Developed microservices and application features using **Java**, **Spring Boot**, **React**, and **REST APIs**, applying **OOP design patterns** for maintainable service design and **5%** faster delivery via smaller releases.
- Optimized complex **SQL** queries with indexing and query-tuning on reporting paths, cutting report generation time by **>10%**. Improved backend efficiency and resource utilization for high-load windows.
- Automated testing using **TestNG**, raising coverage from **60%** to **90%** ensuring robust test coverage.
- Improved high-load backend reliability through performance monitoring, log analysis, and targeted fixes during peak reporting and subscriber operation windows.

OPTIMA Philippines — Backend developer

- Developed and maintained **Apache Camel** microservices handling **1M+** daily transactions with reliable system integrations, monitoring, logging, scalability, and production-grade stability.
- Built and maintained **Jenkins CI/CD** pipelines with **SonarQube** quality gates for automated build and deployment workflows, reducing manual deployment effort by **60%** and improving release consistency, monitoring, and reliability.
- Built internal automation tools: **Fuse Logger** (multi-env log search), **Subscriber Tool** (DB lookup by MIN/accountId), **SM Tool** (deployment automation), **API Visualizer** (end-to-end API flow mapping).
- Supported production incident triage and root-cause analysis using logs, monitoring, and cross-team debugging for integration and workflow fallouts.

Projects

DESKMINGLE — WiFi Social Discovery App

2025 – Present

- Built a live social-discovery app (deskmingle.com) connecting people on the same office or shared **WiFi** network for real-time discovery, matching, chat, and hangouts.
- Developed full-stack features with **Spring Boot**, **Spring Security**, **PostgreSQL**, **OAuth2/JWT** auth, **OpenAPI/Swagger**, **React**, and **WebSocket** realtime messaging; deployed on **Linux** via **Docker** with **HTTPS**.

APNA SHOP — Retail Management App

02/2026 – Present

- Built a live retail management app (apna-shop-zeta.vercel.app) deployed and actively used by **3** shop owners for inventory, sales, customer credit (**udhaar**), and analytics dashboards.
- Implemented full-stack features with **Spring Boot**, **JPA/Hibernate**, **PostgreSQL**, **React**, **TypeScript**, **OTP/JWT** auth, customer trust scores, and revenue/udhaar insights for day-to-day shop operations.

Skills

Languages: Java, Python, C++, C | **Testing:** JUnit, Mockito, TestNG | **Data:** MySQL, PostgreSQL, Couchbase, Kafka

Backend: Spring Boot, Spring Security, JPA/Hibernate, Apache Camel, OAuth2, JWT, REST APIs, OpenAPI/Swagger, Microservices, Design Patterns | **Tools:** Git, Maven, Bitbucket, SonarQube

Frontend: React, Angular, HTML, CSS | **Process:** Agile, Scrum | **DevOps & Cloud:** AWS, Docker, Kubernetes, Linux, Jenkins, GitHub Actions, CI/CD

Certificates / Achievements

- CodinGame Winner Q4'23** at Amdocs — ranked 1st among **10,000+** participants globally.
- Amdocs India Coding Champion; AIR-177** in NIMCET; 4th place in **NITW Hackathon**.
- Certified in **AWS Cloud Practitioner**, **Kubernetes for Beginners**, and **YAML: Zero to Master**.

Education

Master of Computer Applications

National Institute of Technology, Warangal

Warangal, India

10/2020 – 07/2023
